Software Engineer with 2+ years of work experience as Software Engineer at Guardian Life. Skilled in backend development, Java, Spring Boot, REST APIs, Micro services and ReactJS. Strong engineering professional with a bachelor of engineering – BE focused in Computer Science from Sri Sairam engineering college, Chennai.

## SKILLS

Java, Spring Boot, Rest APIs, C, HTML, CSS, Javascript, Junits, ReactJS, BitBucket, Postman, Jenkins, Git, UI/UX, figma.

## EXPERIENCE

### Software Development Engineer II

June 2024 - Present

Comcast, Chennai, TN

- Designed and developed OpenAPIs for the Freewheel MRM application, enabling external approval and QC workflows for Partner Tag Creatives using Spring Boot and MYSQL.
- Extended the functionality of the existing Programmatic Creative API to support listing, retrieving and updating Partner Tag Creatives, tailored to meet specific business requirements.
- Implemented secure and scalable backend services using spring boot, ensuring seamless API integration for external systems and publishers.
- Developed and executed comprehensive JUnit test cases to validate API endpoints, enhancing reliability and performance of the system.
- Utilized Postman for testing and documenting APIs, streamlining the development process and ensuring efficient communication with external stakeholders.
- Contributed to the optimization of API response times and data handling, ensuring efficient processing of marketplace orders at scale.

### Engineer

Jan 2024 - June 2024

Guardian Life, Chennai, TN

- Developed API functionalities for accurate customer validation and retrieving client information.
- Enhanced compatibility by refactoring code from Dot Net to Java, ensuring efficient customer verification and data retrieval.
- Implemented API calls from client to server and then from server to backend java application to retrieve and update data based on user actions, ensuring real-time synchronization.
- Led the UI/UX design with Figma, creating an intuitive dashboard for leveraging the data manipulation of the batch processes.
- Developed responsive components in ReactJS using glic-ui-components to visualize batch process metrics.
- Streamlined file reprocessing with Amazon s3 integration, facilitating efficient backend interaction via API calls.
- Developed the backend Java API for reprocessing the file in amazon S3 bucket based on user actions from the front end.

### Graduate Engineer Trainee

April 2022 - Jan 2024

Guardian Life, Chennai, TN

- Developed a robust backend system for generating ID cards, integrating seamlessly with CDX for automated mail sending..
- Orchestrated communication with CDX ensuring smooth and timely delivery to customers while implementing rigorous testing procedures for accuracy and reliability.

### Summer Intern

Sept 2021 - Nov 2021

Ernst & Young

- Collaborated closely with backend developers to ensure the seamless integration of UI changes with existing functionality.
- Worked on managing and resolving bugs, providing timely resolutions for enhanced stability.

## EDUCATION

### Bachelor of Engineering - Computer Science.

Apr 2018 - May 2022

Sri Sairam Engineering College, Chennai, TN, India.

## ACHIEVEMENTS

- Received **Guardian Life High Five award** for demonstrable outstanding job performance.
- Came in first position with around 15000 participants all over the country in the EY scholarship program and won 1 lakh of cash prize and two months of internship in EY India in front-end development.
